

Biodiversity Policy

vedanta

Protecting and enhancing biodiversity is an integral part of Copper Mines of Tasmania's commitment to sustainable development. Integrating the need for biodiversity conservation into operational decision making processes and taking all necessary measures to minimise impacts, is a commitment across the company.

Copper Mines of Tasmania strives to:

- Prevent, minimise and mitigate biodiversity risks throughout our businesses
- Comply with, and exceed where possible, the local, regional and national legislative requirements on land management and biodiversity conservation and applicable international conventions
- Identify and assess biodiversity status and value before the start of a new project and monitor impacts over the project lifecycle
- Support conservation initiatives and work towards the conservation of threatened/rare and endemic species and high priority conservation areas
- Achieve no net loss (NNL) of biodiversity

We will measure progress against this policy and review performance on a periodic basis to ensure ongoing management of biodiversity.

Peter Walker
General Manager Care & Maintenance
Copper Mines of Tasmania
